Zhejiang BLW Pneumatic Technology is an enterprise specializing in the production of pneumatic components. It is located in Yueqing, Wenzhou, the birthplace of China's private economy, bordering the East China Sea, facing the Oujiang River, and backed by the scenic Yandang Mountains. Equipped with comprehensive facilities and advanced technology, our company offers a wide range of pneumatic blowguns with superior specifications, excellent quality, attractive appearance, and reliable performance. These products cater to the automated production needs of industries such as metallurgy, electromechanical, coal mining, construction machinery, and light industry.

Baliwo Pneumatic Blowguns are designed to be used in conjunction with C4 quick connectors. The gun bodies are made of brand-new PU material, featuring an attractive and exquisite design. The steel tubes are constructed from high-strength stainless steel, resistant to breaking and rusting. By adopting a pure copper piston structure and abandoning traditional spring technology, the gun bodies are leak-proof, with more flexible gun handles. Incorporating novel technology, our products are energy-saving and environmentally friendly. We have collaborated with dozens of foreign companies for OEM production of blowguns, receiving widespread acclaim. We continue to welcome our esteemed domestic and international clients, both new and old, with "superior quality and excellent reputation."
